

Sports Way Trading — Project Proposal & Quote

Dear Ahmad,

Based on our discussions and your answers to the questionnaire, here is the detailed plan for the next phase of work, broken into three parts, with the price and estimated time for each.

Phase 1: Website Redesign & Dolibarr Integration

- Full website redesign: modern look, faster loading, mobile-friendly, easier navigation
- Direct connection between the website and Dolibarr so the stock shown online matches your real stock in real time
- Out-of-stock items handled correctly instead of staying listed indefinitely on the homepage
- WhatsApp button corrected so it carries context (product, page) when a customer reaches out, instead of starting from zero
- SEO and performance improvements

Price: \$250

Estimated time: 1 to 2 weeks

Phase 2: Custom AI Agent (Dolibarr + Website)

- AI agent built directly inside Dolibarr, used by your sales team to instantly check stock, pricing, and customer information, and to help prepare quotes and invoices
- Lightweight chatbot added to the website, limited to common, repetitive questions (hours, location, basic product info)
- Any question beyond that hands off automatically to WhatsApp, with the context already included so your team doesn't start from scratch

Price: \$400

Estimated time: 2 to 4 weeks (including tests and verifications)

Phase 3: Email Marketing Automation

- Reuse of the same AI agent to launch automated email marketing campaigns
- Built using your existing customer email database
- Personalized content and segmentation between business and individual customers for better results

Price: \$150

Estimated time: 2 weeks

Total estimated investment: **\$800**

Total estimated time: 5 to 8 weeks

Payment can be arranged upon completion of all three

Best regards,
Mohamed OUABBI
